Some people believe, the conspirators! that he faked his death and is now workin gfor the government, no family and no friends. Locked away to make bigger and better bombs,

I'm sure thats what the conspirators want to believe.

How about something simple and closer to the truth, he had something big that would change the planet, and wouldnt sell out, to hide his patent, like probaly many others before him, way back to the war, when hydrogen was mass produced. wasnt the Blimp in germany hydrogen?
